

EISC Professional Conference, Prague, 28 March 2008

Topics for the Panel Discussion

Questions on the way ahead for Galileo and GMES

1. How can countries, in particular the smaller ones, develop niche markets and what competences do they need?
2. How to identify, understand and interact with the users?
3. How can service continuity be guaranteed for commercial uses and what liability regime(s) should be enacted?
4. What missions and structures should be foreseen for operating Galileo and GMES?
